So through this, be a great viewers now!

GREEN LIGHTING (TAB GREEN GURU GUIDES) BY BRIAN CLARK HOWARD, SETH LEITMAN, WILLIAM BRINSKY PDF

Flip the switch to energy-efficient lighting

This do-it-yourself guide makes it easy to upgrade residential and commercial lighting to reduce costs and environmental impact while maintaining or even improving the quality of the lighting. Filled with step-by-step instructions, Green Lighting shows you how to save money and energy with light-emitting diodes (LEDs), compact fluorescent lighting (CFL), solar lights, windows, skylights, fixtures, controls, and other bright ideas. Methods for calculating return on investment, plus recommended sources for energy-efficient products, are included in this practical resource. Green Lighting covers:

- Color temperature measurements
- In-depth details on the differences between LEDs and CFLs
- How utilities bill for electricity usage
- Comparing wattage and determining energy savings
- ENERGY STAR® ratings
- Purchasing appropriate bulbs, fixtures, and sensors
- Developing a comprehensive green lighting plan for your entire home, office, or commercial environment
- Incandescent, halogen, and gas-discharge lighting
- Solar and next-generation lighting

- Sales Rank: #1815149 in Books
- Published on: 2010-09-24
- Original language: English
- Number of items: 1
- Dimensions: 9.30" h x .45" w x 7.40" l, .89 pounds
- Binding: Paperback
- 240 pages

I See The Light!

By J. Yeager

I see the light! And thanks to the book *Green Lighting*, by Brian Clark Howard, Seth Leitman, and William Brinsky, it's costing me less and it's easier on Mother Earth than ever before. I'm a huge fan of do-it-yourself projects, but most DIY books devote, at most, a chapter to lighting and barely a word to eco-friendly lighting options. *Green Lighting* provides easy to follow instructions and contains a mega-wattage of supporting materials and additional resources. Well researched and organized, *Green Lighting* helps readers understand not just how to incorporate green lighting into their lives, but why it makes so much environmental and economic sense to do so. This book will pay for itself over and over again, every month when you get your incredible shrinking electrical bill. Unless you're Amish, you need to read this book today.

Jeff Yeager

Author, *The Cheapskate Next Door* and *The Ultimate Cheapskate's Road Map to True Riches*

6,700,000,000 light bulbs

By Remy Chevalier

I'll admit I'm biased because our anti-nuclear organization Rock The Reactors contributed research and assistance to the development of this book. So rather than write a glowing review, let me repost this comment I read on the Huffington Post recently, written by a blogger who goes by akvdh1:

"The biggest and quickest savings comes from wasteful energy inefficient lighting that accounts for 23 percent of all electricity consumption. 6,700,000,000 light bulbs and fixtures screaming to be replaced with energy efficient LED, OLED and better building designs to add natural light in retrofit and new buildings."

That should make enough of a case to suggest this book to all the boutiques, salons, spas, galleries, restaurants, nightclubs, hotels, factories, showrooms, homes and schools you can find, ask them to pick up a copy of this amazing book so we can kick off the LED revolution!

Great Read! Helped me convince my wife to make the switch to LED's

By Rob Tucker

I've been wanting to upgrade my house to LED's for the last year or so. However, my wife was not willing to let me spend the money I needed to get the best units. In part of my research, I bought this book about

"Green Lighting" and it was just fascinating to read through it. Because of this book, I was able to convince my wife that it would be a wise move and also a great eco-choice. If you're interested in learning about green lighting, I would highly recommend this book. It will tell you everything you need to know.
