Missed several exam objectives

By M Srinivasan

Used Linux for few years, and want prep for the RHCSA and RHCE exams. I study exam objectives from Red Hat, and read book. Yes, I see exam objectives on start of chapters. But several exam objectives not covered inside chapter. I quote exam objectives from Red Hat.

I read whole book, and searched e-book, so I think book missing coverage of all these objectives.

1) Can't find `2>`, `star`, `bzip2` commands. I know these commands already, so I forgive these missing objectives. But Red Hat thinks important enough to have in exam objectives.

2) Red Hat objective: "Locate, read and use system documentation including `man`, `info`, and files in `/usr/share/doc` [Note: Red Hat may use applications during the exam that are not included in Red Hat Enterprise Linux for the purpose of evaluating candidate's abilities to meet this objective.]"  
Red Hat gives special warning on this, so I think it extra important for exam. But not in book.

3) "Use single-user mode to gain access to a system"

Listed at start of Chapter 2. Search shows single user mode in Chapter 21 (I search e-book). But nothing in book to get single-user mode, just "appending the command line during boot". Which command line? Where is prompt during boot? Grub or bash?

4) "Modify the system bootloader"

GRUB is system bootloader. I see no example of change to GRUB config file in book.

5) "Configure a system to authenticate using Kerberos"

No words to configure Kerberos client, only "You should also practice connecting a client with Kerberos authentication as well as shadow passwords." Not enough. Where is krb5.conf in book? Important for Kerberos client.

6) "Configure a system as an iSCSI initiator that persistently mounts an iSCSI target"  
Not in book.

7) "Install Red Hat Enterprise Linux systems as virtual guests"  
Not in book, unless Virtualbox on exam. Virtualbox is Oracle product.

8) "Configure systems to launch virtual machines on boot"  
Not in book.

15 of 16 people found the following review helpful.

This book is a disappointment.

By N.K.

The text and the labs have an incoherent relationship. Labs have tasks not covered in the chapter and no references are provided for where the lab specific task or knowledge may be obtained. This book is a disappointment.

Wouldn't Recommend

By S. Hall

Too many typos, mistakes, copy-paste errors, and bits left out. There was supposed to be errata but I haven't seen anything yet.
