Don't have a private instructor? Start here!

My wife and I purchased this book for our nine year old daughter so she could learn how to play our family piano. We thought we would try a book and let her go at her own pace to see if she enjoyed it. First of all, the kid loves the book. She's stuck with it and loves to show off her new chops. It's been about three months and she plays everything in the book without a problem. Recently, she's started doing it from memory. We're ready for the next volume to see where it goes, but obviously this book does exactly what it says it will do and she's had a great time doing it. It's light hearted, fun, encourages practice and teaches what it's supposed to. Nuff said!

Excellent Beginner Book

By Cassandra Dickison

I purchased this book for a student who was new to the piano and just beginning lessons. She is a month into it now and is excelling, which I believe can be attributed to the excellent style of this book. It eases beginning students into first knowing the proper hand position, then learning note names, and finally learning to read music on the staff. I especially appreciated that the first few "songs" in the book were repetitive finger exercises, yet still helped the student feel as if she was playing music right away. I will be happy to continue using this series.
