Poor quality and structure

By Crystal Arrietta

I am currently using this text for a 300 level course and it is very disappointing. The text is structured so poorly that it does not lend well to the learning process. The chapters are organized in a way that does not build upon the previous one. The information that is vital to conducting social science research is not well thought out or comprehensive. I may be bias because I am used to text that are very structured and build upon each chapter. Currently my instructor has to take the material and add or subtract information with makes learning difficult. My professor has stated that he will not be using this text in the future thankfully. It just is not anywhere near 300 college level material :-(< If you can find a used copy or rent I strongly recommend doing so as it is not worth the cost of purchasing.
