Good book.

By The Yokel

Gives a great lay-out and explanation of concepts without overwhelming the reader. You can use this as an overview of topics, and then go to something like GM's Repertoire for more in-depth thoughts on particular ideas.

Would need someone better than me to give a more formal review. 1812 FIDE.

A decent survey of 1.e4 e5, but....

By William Sarrano

The "Starting Out" series of books tend to be of mixed instructive value. Some are more "talky" than others, emphasizing explanations and giving basic annotations that are easy to understand for the novice to intermediate level player (say 1100 to 1500 elo). Others go in the opposite direction, focusing more on long variations ending with not-so-helpful explanations such as "...and white is better here" or "...black seems to have more pull in this position". This book tilts towards the latter group.

While these types of books are fine for more experienced players (and are perhaps preferable for them), someone buying a "Starting Out" book is probably not an advanced chess player, and will instead want something that explains to them in detail why certain moves are played and what basic themes and strategies they should keep in mind. In this, the book provided minimal value.

So if you're a somewhat experienced player (about 1500 elo), and you're looking for a survey of all the openings associated with 1.e4 e5, this may be a decent book for you. Otherwise, there's not much to recommend it to lower rated players.

Excellent

By Jan Braun

(my strenght right now - about 2100)

This book is called Starting Out...it can be misleading, however it is also quite deep and it can provide you with a good knowledge of the particular opening.

I purchased it because I already own 1 book from Glenn Flear (The Ruy Lopez Main Line), and I found it very usefull.

5 stars for sure for this book
