UNITED STATES NAVY AND MARINE CORPS AVIATION SQUADRON LINEAGE, INSIGNIA, AND HISTORY: VOLUME 2: MARINE SCOUT-BOMBER, TORPEDO-BOMBER, BOMBIN PDF

This is the only work covering the history and lineage of Marine Attack squadrons, from the date of their activation forward, until their deactivation, or the present. Thoroughly researched, it has a complete, extensive bibliography, and the illustrations of the insignia are almost entirely from originals. Many of the photographs have never been published, and many are from the extensive photo archives of Northrup-Grumman. Historically accurate, yet lacking the dry recitation of names, dates, and facts found in other historical works, this very readable book is written to be enjoyed from cover to cover.

Marine Aviation Squadron History

By R. J. Morgan

Mike Crowder has written the 2d volume of what may end up being a long string of books on Marine and Navy aviation squadron histories. Vol 1, now out of print, covered Marine fighter squadrons (VMF and VMFA) while this effort deals with attack (VMA) units and their WWII predecessors (VMB, VMSB, VMTB). The author understands the arcane terminology of the service, where units are "Activated" and "Deactivated" and not "Commissioned" and "Decommissioned"; two terms that don't apply. Each unit is covered in narrative fashion with a wonderful selection of squadron patches and insignia provided as well; much of which came from the late (and remarkable) "Mule" Holmberg's collection. Production quality is very good; exactly what you'd expect from publisher Schiffer. Personally I would've preferred to see Marine units listed sequentially by number as some famous attack units (like VMA-121) are in Vol1 because in their latest form (VMFA-AW-121 in this case); which leads to some confusion. That being said, this is a nice book; we look forward to further volumes.

Three Stars

By Mark Olinger

Disappointed that more squadrons were not included. Prompt deliver.
